

5.1.3 - Capacity building and skills enhancement initiatives taken by the institution include the following:

- 1. Soft skills**
- 2. Language and communication skills**
- 3. Life skills (Yoga, physical fitness, health and hygiene)**
- 4. ICT/computing skills**

Our college is dedicated to improving scientific communication and language proficiency among students. We recognize that strong communication skills are essential for academic success and future careers, especially in today's globally connected world. In line with this, we have organized several initiatives to support the development of these skills. Building on the success of previous English language programs conducted by the English Department, we will continue to offer specialized language proficiency courses aimed at enhancing reading, writing, speaking, and listening skills. These courses will cater to students from all disciplines, ensuring broad accessibility and engagement.

Additionally, recognizing the importance of holistic student development, we are committed to fostering physical well-being and promoting a healthy lifestyle. To this end, we will organize regular sports activities, fitness sessions, and health hygiene programs conducted by sports and IQAC. These initiatives are designed not only to improve physical fitness but also to encourage students to adopt sustainable health practices. Our approach is to integrate academic excellence with physical and mental well-being, thereby supporting students in their overall growth and success.

Furthermore, in response to the growing need for digital literacy, our faculty members will integrate ICT (Information and Communication Technology) methods into their teaching. Through the use of digital tools, such as presentations and online platforms, instructors will facilitate more interactive and engaging lessons. This integration of ICT will enhance the learning experience, making it more accessible and aligned with the needs of the modern world.

Through these comprehensive efforts, we aim to create an environment where students are equipped with both the communication skills and the physical health needed for success in their academic and professional lives.
